ABOUT US

Barani Group with over three decades of industry expertise, is a pioneer in customized hydraulic machine building, pressed components, and sub-assembly manufacturing. Our strength is built on robust mechanical and metallurgical capabilities that enable us to deliver high-performance engineering solutions.

Barani Ferrocast Private Limited, established in 2013, specializes in manufacturing premium grey cast iron and ductile iron components. With a strong vision to lead the foundry industry, we provide complete end-to-end casting solutions - from product development and methoding to metallurgical excellence and final machining.

Driven by innovation and supported by an experienced and skilled team, we are committed to delivering precision, reliability, and unmatched value to customers across a wide range of industrial sectors.

MANUFACTURING CAPABILITIES

Moulding :

- Green Sand Moulding with DISA semi-automatic simultaneous jolt- squeeze machines
 - ARPA 300: Box size 520 × 400 × 150 mm, Casting Range 1–20 kg
 - ARPA 450: Box size 700 × 650 × 250 mm, casting range 1–60
- Fully automated DISA Sand Plant ensuring consistent and controlled sand quality
- Hand Moulding (CO₂ process) for complex, prototype, and low-volume castings, with a weight range of 50–650 kg

Melting :

- Inductotherm Tri-Track Induction Furnaces:
 - 750 kg × 2 nos
 - 1 MT × 1 nos
- Proven capability in all grades of Grey and Ductile Cast Iron, including LT grades

Core Shop :

Types of core

- **01** CO₂ Core Process
Weight Range: 1 – 90 kg
- **02** Resin Core Process
Weight Range: 1 – 200 kg
- **03** Amine Cold Box Core Process
Weight Range: 1 – 15 kg
- **04** Shell Core
Weight Range: 0.2 - 5 kg

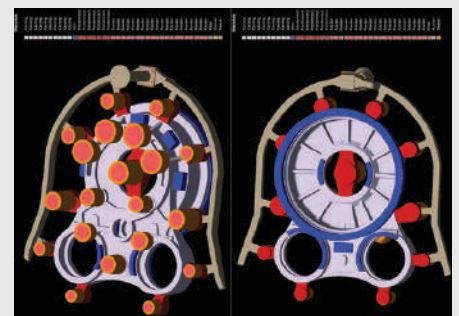

NPD & Pattern Shop

Pattern Design & Manufacturing :

- Pattern design and layout will be finalized by our engineers
- Three specialized vendors are available for new pattern making
- Lead time: 8 weeks for submission of the first sample along with pattern making

Pattern Repair & Maintenance :

- Dedicated workshop for pattern repair, core box repair, and maintenance
- Quick turnaround to minimize downtime and delays
- Ensures dimensional accuracy and superior surface finish
- Supports customization and design modifications
- Preventive maintenance to extend the life of patterns
- Pattern-wise separate storage rack system for patterns and core boxes

Fettling Shop :

- Automatic hanger type DISA shot blasting machines with a capacity of 500 Kg for each batch
- 10 numbers of Pedestal Grinders attached to dust extraction system
- Swing Frame Grinders
- Mount point - Pneumatically operated air grinders
- Well-equipped painting shop is attached to the fettling shop

Lab Facilities :

Necessary Testing Equipment's are Available

- Microscope
- Spectrometer
- Sand Lab
- UTM
- Hardness testing
- Impact testing

We Specialize In : Spheroidal Graphite (SG) Iron:

- SG 350/22
- SG 400/18, 400/15, 400/12
- SG 450/10
- SG 500/7
- SG 550/6
- SG 600/3, 600/10
- SG 650/5
- SG 700/2

Grey Cast Iron (FG):

- FG200
- FG220
- FG250
- FG260
- FG300

Products & Applications :

Automotive
